Crestron Touch Panel Quick Help Guide

Tap anywhere on the touch screen to begin using the projector.

Using the Projector

1. Touch the “Sources” button in the left menu to bring up the Sources menu.

2. Tap on one of the source icons below to choose the device to display from.

3. Touch either the “Left Display” or “Right Display” buttons on the top of the screen to select a screen to display on.

Display Options

1. Touch the “Display” button in the left menu to bring up the Display menu.

2. Touch the “On” and “Off” buttons to toggle the power to either projector.

3. Use the “Image Mute” buttons to hide the display of the projector without turning it off.

Contact the ATC at atc@wpi.edu or at extension x5220 for technical help!
Volume Settings

1. Touch the “Volume” button in the left menu to bring up the Volume menu.

2. Touch the arrow buttons on the left side of the screen to increase the volume of the projector or to mute it completely.

3. Touch the arrow buttons on the right side of the screen to increase the volume of the room microphone (if there is one.)

Room Settings

1. Touch the “Utilities” button in the left menu to bring up the Utilities menu.

2. Touch the buttons under the “Lights” category to select different room lighting modes.

3. Touch the up and down arrows in the “Shades” category to control the shades in the room.

4. Touch the square button to stop the shades from moving.

5. Touch the up and down arrows in the “Screens” category to control the projector screens.

Shutting Down

Touch the power button in the lower-left of the screen to power down the projectors and raise the screen when you are finished.
