Setting up the Projector

1. Press the POWER button to power on the projector.

2. Press the SCREEN button to lower the screen.
3. Press the SOURCES button to display available items to project.
4. Tap the item on the touch screen to select the source that matches your device. “Laptop” will display a connected laptop, “Video” will display anything connected to the video inputs, and “HDMI” will use anything within the outlined box below.
Using the Microphone

1. Plug in an XLR-input microphone into the labeled Microphone Input shown below.

2. Use the MIC volume buttons to control the volume that plays into the room.

Powering Down the Projector

1. Press and hold the POWER button to bring up a confirmation screen, and use the touch panel button to turn off the projector.

2. Press the SCREEN button to raise the projector screen.
