School Bus Wi-Fi
Samuel Bacchiocchi, Theodore Bieber, John Dyer
GPS: Ignorance is NOT Bliss
Advisors: Professors Paul Kirby & Robert Traver, Mariana Vertoni (PLA)

Background
• Centralized school districts result in long bus rides.
• Long bus rides cut into valuable time for students.
• Most buses do not provide a suitable work space.
• Installing Wi-Fi on school buses is a solution.

Problem
• Many school districts do not yet know about the benefits of installing Wi-Fi on school buses.

Solution
• Created a website for school administrators.
• Includes information relevant to school bus Wi-Fi.

Approach to Website

• Home Page: Directs users to pages of website.
• Articles Page: Links to school bus Wi-Fi articles.
• Problems Page: Link to program that brings mobile devices to low-income areas.
• Opinions Page: Survey answers from schools and companies.
• Providers Page: Links to school bus Wi-Fi solutions.
• Forum Page: Place for school administrators to discuss ideas.

Assessment
• Aspects of website rated on a scale from 1 (strongly disagree) to 5 (strongly agree).
• Each aspect was considered successful if the median score was 4 (agree) or above.

Results
• The median score of each aspect of the website was at least a 4.
