2004 Award Recipient

David S. Brin ‘84

David Brin, your accomplishments in the medical technology industry make you a source of pride for your alma mater.

During your undergraduate years, you excelled in mechanical engineering, receiving your bachelor’s degree in 1984. You were inducted into both Pi Tau Sigma, the ME honor society, and Tau Beta Pi, the national engineering honor society. And you were active in the crew program.

Your educational achievement continued with the attainment of an M.S. in mechanical engineering from the Thayer School at Dartmouth College in 1989, and a doctor of jurisprudence from Suffolk University in 1994. You maintained your connection with WPI by serving as a class agent, as a Reunion volunteer, and as a speaker at WPI’s Career Day in 1989.

Your career led you first to Westinghouse, then to Medtronic – called by some “the world's leading medical technology company.” Medtronic provides products and services in the areas of cardiac rhythm management, neurological and spinal surgery, cardiac surgery, and vascular health. In Massachusetts, you were engineering manager for Medtronic Interventional Vascular, before moving to California, where you were named vice president for research and development for Medtronic Vascular.

David Brin, your history of accomplishment and your dedication to the field of medical technology are a source of pride for WPI. It is an honor to present you with the Ichabod Washburn Young Alumni Award for Professional Achievement.
