Response rates in 2011 and 2010 were 92 percent and 96 percent, respectively. The data presented in this report includes only those students who reported their status.

Total placement levels of undergraduate students have remained steady over the past three years. More students entered the workforce directly, increasing from 55 percent in 2010 to 66 percent in 2012. Placement rates for those earning advanced degrees are exceptional, with 98 percent of graduates employed or pursuing additional education six months following graduation.

WPI continuously monitors the status of graduates that are still seeking employment, offering additional support as needed, as well as lifetime career services for all alumni.

Businessweek ranks WPI 15th in the nation for return on investment. In 2012, the average starting salary for graduates earning bachelor's degrees is \$56,723.
