Meet our Students

1. **Home:** Caracas, Venezuela
2. **Year of Graduation:** 2016
3. **Why did you choose WPI?**
   I chose WPI because of its philosophy of combining theory and practice, its small student faculty ratio and its flexible project-based curriculum. Also, I had the opportunity to talk to friends at the school, and they told me about WPI’s vibrant community and encouraged me to come.
4. **How has WPI’s philosophy of Theory and Practice, and working with teams, been beneficial to you during your time at WPI?**
   WPI’s philosophy has helped me become more comfortable working in teams, gain hands on experience and improve my communication skills. The projects enable a collaborative environment where you are continuously learning from your peers and your peers are continuously learning from you. As a sophomore I had to work with other students in projects and ECE laboratories.
5. **How have the ECE professors helped you in your studies?**
   ECE professors have been very helpful and friendly. ECE professors care about the students, and they want to help us learn the material and become better engineers. They have helped me engage with the material and motivated me to learn.
6. **What do you hope to do when you graduate? What would be your ideal job?**
   I’m still considering applying to the BS/MS program at WPI, which would allow me to stay an extra year and obtain a MS. After I graduate I would like to work for a company and apply the knowledge I gathered at WPI in the industry; as an engineer I am eager to create.
7. **Please list any other groups or extracurricular activities you participate in at WPI:**
   Eta Kappa Nu (HKN)
   The Towers
   Photography Club
