Home delivery frequently asked questions

Why should I use home delivery for my prescriptions?
Home delivery is a convenient and cost-effective way for you to order up to a 90-day supply of maintenance or long-term medication for delivery to your home, office or location you choose. Make fewer trips to the pharmacy and save money on your prescriptions.

What is a maintenance medicine?
A maintenance medicine is one you take on a regular basis for long-term conditions such as arthritis, diabetes, high blood pressure, ulcers and many others.

How do I use home delivery for a new prescription?
1. Enroll in home delivery online at optumRx.com. You’ll need to provide your address and payment details as well as health and allergy information. Or, you can fill out an order form and mail it to the address on the form.
2. Have your doctor write your prescription for the number of days your plan allows for mail order (for example, 90 days). Your doctor can call, fax, or electronically prescribe your medication for home delivery.
   If your doctor gives you a written prescription, fill out an order form. This form includes a confidential patient profile section. Write the member identification number, patient name and patient date of birth on the back of each prescription. If you are sending a prescription for a family member, fill out an order form for that patient.
3. Mail the form with the prescription(s) and copay to the address on the order form.
4. We will ship orders to the address you provided.
5. Make sure you review your order within 21 days of receiving it. Contact us immediately to report any issues. Member service representatives and clinical pharmacists are available to discuss any questions. Call 1-855-546-3439, TTY 711.

How do I refill a prescription I have already received through home delivery?
Do one of the following:
• Visit optumrx.com. You may be also able to set up auto refill for your medications.
• Call 1-855-546-3439, TTY 711 or call the phone number on your prescription bottle.
• Send in the refill slip that came with your previous order. Be sure to include your copay.

How can my doctor order a prescription for me?
Instead of writing a prescription, your doctor may:
• Call us at 1-855-546-3439, TTY 711.
• Fax directly to the pharmacy location. Note that to be legally valid, the fax must originate from the doctor’s office. All state laws apply.
• Electronically prescribe your medication for home delivery.
In addition to prescription information, your doctor must provide member ID number, patient name and patient date of birth.

Timing and shipping

When will I receive my order?
You should receive your order within 14 days from the time we receive your prescription order. Generally it takes one to two days to be processed and mailed if no additional information is required. Please allow a few extra days for your first order. You can track your order on optumrx.com, or you can call member services.

What could cause a delay in prescription processing?
Your prescription could be delayed if:
• Your prescription is incomplete or unreadable
• There is a manufacturer backorder
• Your medication requires prior authorization
We will notify you if there will be a delay with your prescription shipment. Your prescriptions may ship in separate packages to avoid delaying your whole order, if necessary.
Note: Orders received without payment may cause processing delays and extended delivery times.

How can I check on the status of my prescription order?
Visit optumrx.com or call 1-855-546-3439, TTY 711. You can also opt in for email shipping notifications through our website.

Am I charged for shipping?
No, shipping is free. Rush shipping is available for an extra charge.
If I pay for rush shipping, when will my prescription arrive?
Rush shipping reduces only the shipping time for your order. It does not affect the time it takes to process your prescription at our pharmacy. Quality checks and exceptions (such as needing additional information from your doctor, prior authorizations or drug interactions) can delay your prescription.

Why am I receiving overnight shipping when I did not request it?
We ship certain medications with special handling requirements overnight at no charge to you. This may include prescriptions for controlled substances or medications that are temperature sensitive.

What happens if I don’t receive my order?
If you do not receive your order within 14 days, please contact us. We will reship your order. It is our priority to make sure you have the medication you need.

Prescription refills
How do I know whether I have refills remaining on my prescription?
The number of refills allowed is noted at the bottom of your medication label, on your refill form and on optumrx.com.

How soon can I order a prescription refill?
For most prescriptions, you may reorder when you have approximately three weeks of your prescription left. Your prescription label includes a target date for refilling the prescription.

When you order refills online or through the automated phone system, you will receive a message if your prescription is “too soon to refill.” You will be given the date when refills will be available.

If you place a refill order after the expiration of your prescription, or if no refills are remaining, we will contact your doctor for a new prescription. This may cause a slight delay.

I have a prescription on file at a retail pharmacy; can I order refills by home delivery?
Yes, however a new prescription from your doctor is required.

Medication coverage and cost
What drugs are covered?
Your plan decides which medications are covered through home delivery. To look up a specific medication, visit optumrx.com or call 1-855-546-3439, TTY 711.

How much will my medicine cost me?
Look up the cost of your prescription using Price and Save on your member website.

How can I pay for my home delivery prescriptions?
We accept checks, money orders or major credit cards. When you set up an online profile, you can choose to have a preferred credit card securely kept on file for future orders.

Miscellaneous
How do I get additional order forms?
You can print order forms from optumrx.com. You will also receive a reorder form, refill form and pre-addressed envelope with each prescription mailed to you.

Can I speak with a pharmacist if I use home delivery?
Yes, pharmacists are available to answer any medication questions. Call the number on your prescription bottle or 1-855-546-3439, TTY 711.

Can I fax my prescription that I received from my doctor?
No. Legally, we can only accept faxed prescriptions from your doctor’s office.

Is my information kept private?
Yes. We ask you for some personal information and we keep this information completely private. We use this information to help make sure you get the best care possible.

Why did I receive less than a 90-day supply of my prescription?
The most common reason is that your doctor may have only written the prescription for 30 days, or a prepackaged medication may not be packaged as a larger days supply. Remember to ask your doctor to write a prescription for up to a 90-day supply, with up to three refills, if your doctor determines it’s appropriate.

What is a “controlled” medicine?
A controlled medicine, such as a narcotic, has stricter guidelines and may be handled differently than non-controlled medicines, such as a medication for diabetes. We adhere to federal and state laws in the dispensing of all medicines. State law may require a copy of a state-issued ID, such as a driver’s license, for controlled medications to be dispensed.
