Learn the latest developments in surface hardening processes, performance and properties from international experts.

Be the first to find out about breakthroughs in this technology at the International Symposium on Surface Hardening of Corrosion Resistant Alloys.

Want to reach a targeted audience of qualified decision makers? As an exhibitor and/or sponsor, you benefit from positioned branding to interested attendees and decision makers in the heat treating industry.

Don’t miss your opportunity to join the growing list of sponsors. For more information, please contact Kelly Thomas, National Account Manager at 440.338.1733 or kelly.thomas@asminternational.org.

This field of surface engineering is an emerging technology with multiple areas of active research. Take part in this opportunity to learn the latest from the best.

Share ideas and advance your career. Plan and register today.
