El Caño Self Guided Tour
Kayla Baez (CE), Mary Kandaras (ME), Matthew St. Louis (CS), Jessie White (MAC)
Advisor: James Chiarelli

Purpose
Archaeological interpretation is the process of analyzing excavated materials/related data to explain:
- Cultural heritage
- Changes in human behavior

Archaeological interpretation must be accessible for maximized visitor learning and experience.

Project Goal
Design a framework that will make archaeological interpretation in El Caño Archaeological Park more accessible to non-Spanish speakers.

El Caño Background
- Burials dating from AD 680 - 1020
- Transformed into archaeological park in 1979
- First Excavated in 1929
- The park contains remnants of the Coclé civilization
- Excavations are still happening today

Methodology
- ADOBE XD
- BROCHURE
- FIRST DRAFT
- CODING MOBILE APP
- SPONSOR FEEDBACK & CHANGES
- THIRD PARTY TESTING & REFINEMENT
- FINAL PRODUCT

Analysis
The refinement process provided feedback on the application and edits were made accordingly. Our final application has 3 main features.

3 Main Features of App
- Language Settings
- Interactive Map
- Points of Interest

Findings/Conclusion
- The native app can be converted back into a progressive web app if needed by the foundation.
- The native app will require updates to be made annually using our O&M Manual

Acknowledgments
We would like to express our gratitude to Fundación el Caño, including Alexa Hancock for her assistance, support, and collaboration throughout the project and Dra. Julia Mayo for her feedback and assistance in design iteration. We also thank our advisor James Chiarelli, Panama Project Center Director Aaron Sakulich, and our sponsor Ricardo Montanari, for their constant dedication to our project’s success. A special thank you to the other Footprint IQP team for their collaboration throughout this project.
